

LandMark White Limited  
ABN: 50 102 320 329

## RISK MANAGEMENT POLICY

The Board is responsible for approving and reviewing LandMark White's ("LMW") Risk Management Framework.

The operation of the framework and the management of risk and the implementation of mitigation measures are the responsibility of management.

On an annual basis the Board considers the significant business risks applicable to the business and ongoing operations. Additionally, the Board considers risk profiles as part of the annual strategy and budget reviews.

To assist in discharging its responsibility in relation to risk management, the Board has delegated certain risk activities to the Audit and Risk Committee. The responsibilities of the Committee are contained in the Committee's charter.

The Audit and Risk Committee's primary function in the Risk Framework is to assist the Board in its responsibility to exercise due care, diligence and skill in relation to LMW in the:

- review of Management processes for the identification of significant business risks and exposures;
- review and assessment of the adequacy of management information and internal control structures; and
- assessment of LMW's adequacy in managing risk.

The Committee plays a key role for the Board in oversight of management's application of the ASX Corporate Governance Council Guidelines in respect of Financial Reporting and Risk oversight.

### 1 Risk Profile & Management of Risks

LMW regards business risks as "threats to the achievement of LMW's objectives and goals and to the successful execution of its strategies".

LMW's Risk Management Framework is based on the Australian/New Zealand Standard (AS/NZS 4360:1999) for risk management.

Each division of LMW periodically conducts reassessments to identify and rank all significant business risks arising from current operations and new business initiatives, and to identify and implement containment measures.

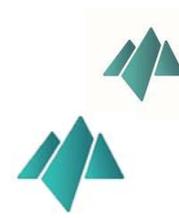

The list of operational risk categories used by LMW for assessments is available to all staff.

All staff have a responsibility to identify and manage risks within their responsibilities.

Management's responsibility is to incorporate the risks and mitigants in the Risk Register for their area of responsibility.

The CFO (as Chief Risk Officer) and the CEO have responsibility draw the various Risk Registers within the Company together and oversight and manage mitigations, reassessments and reporting.

The Risk Reassessments are reported through the Chief Financial Officer to management and the Audit and Risk Committee, and annually to the Board.

## 2 Compliance & Control / Assessment of Effectiveness

The Audit and Risk Committee has responsibility for overseeing management's processes and results in identifying, assessing and monitoring risks associated with LMW business operations; and the implementation and maintenance of policies and control procedures to give adequate protection against key risks.

The risk management and internal controls systems within LMW encompass all policies, processes, practices and procedure established by management and/or the Board to provide reasonable assurance that:

- Established corporate and business strategies and objectives are achieved;
- Risk exposure is identified and adequately monitored and managed;
- Resources are acquired economically, adequately protected and managed efficiently and effectively in conducting the LMW business;
- Significant financial managerial and operating information is accurate, relevant, timely and reliable; and
- There is an adequate level of compliance with policies, standards, procedures and applicable laws and regulations.

APPROVED BY THE BOARD JULY 2019
